## **DETAILED ACTION**

### ***Application and Claims Status***

1. Applicant's preliminary amendment filed 10/13/2005 is acknowledged and entered.
2. Claims 1-20 were pending. Applicants have amended the instant specification to by inserting in the first line regarding cross-references to related application(s). No claims were amended, added, and/or cancelled. Therefore, claims 1-20 are currently pending and are under consideration in this Office Action.

### ***Election/Restrictions***

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group A, claims 1-4, drawn to a method of producing gamma corrected values.

Group B, claims 5-7, drawn to a method of gamma correcting an LCD display.

Group C, claims 8-20, drawn to a projector.

4. The inventions listed as Groups A-C do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups A-C appears to be that they all relate to a display apparatus comprising a liquid crystal display panel and a gamma correction circuit. This special technical feature is well known in the art. Moreover, Naito (US Patent 6,462,735 B2) discloses a display apparatus comprising a liquid crystal display panel (ref. #410 of fig. 2) and a gamma correction circuit (ref. #220 of fig. 2) (see e.g. Abstract; col. 3, lines 8-22; col. 7, lines 10-43; fig.

Art Unit: 2629

2). Therefore, the technical feature linking Groups A-C does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
